Author Index—Volume 47

Alic, J.A., 139
Amara, R., 132

Berry, B.J.L., 115
Bestuzhev–Lada, I., 125, 128, 138, 144
Black, R.L., 293
Bowonder, B., 229, 309

Coates, J.F., 23, 255, 345

De Greene, K.B., 171
Dror, Y., 127, 129, 131, 135, 140

Geisler, E., 189
Glenn, J.C., 147
Goldberg, W., 137
Gordon, T., 49
Gordon, T.J., 147
Greenspan, D., 49
Griffiths, C., 205

Halal, W.E., 125, 128, 130, 134, 136, 138, 140, 141, 143
Hines, A., 23

Kash, D.E., 35

Linstone, H.A., 1, 229, 309

Mahaffie, J.B., 23
Marchetti, C., 75
Marcy, W.M., 293
Martino, J.P., 126, 129, 135, 137, 138, 144
Meyer, P., 89
Mitroff, I.I., 351
Miyake, T., 229, 309
Modis, T., 63, 125, 128, 130, 136, 138, 139, 143
Moll, P., 126, 128, 130, 135, 136, 142, 143

Oldham, W.J.B., 293

Pelc, K.I., 136
Porter, A., 125, 126, 130, 138, 140

Rhyne, R.F., 277
Rycroft, R.W., 35

Sharif, N., 103
Simmonds, C., 126, 129, 130, 135, 136, 140, 142, 143

Willcocks. L., 205

Yin, J.Z., 265

Book Index—Volume 47

Godet, M., *From Anticipation to Actioncolon A Handbook of Strategic Perspective* (Oscar Hauptman), 261

Hiltz, S.R., Turoff, M., *The Network Nationcolon Human Communication Via Computer* (William E. Halal), 261

TECHNOLOGICAL FORECASTING AND SOCIAL CHANGE 47, 354–356 (1994)

Subject Index—Volume 47

Active matrix crystal displays, innovation systems and, 229, 309
America
  corporate and government, future as pursued by, 29
  ethics and, 345
    (rebuttal, 351)
  new millenium and, 115
  technology policy and, 35
Anthropological invariants, personal travel and, 75
Apocalyptic prophecy, 115
Asia, technology policy and, 35
Assumptions, contextual discipline and, 277
Attraction, to regular trajectory in transformed space, 49

Babyhood to childhood transition, 63
Basic instincts, personal travel and, 75
Batching, Millenium Project and, 163
Bi-logistic growth, 89
Blurred boundaries, technology policy and, 39
Britain, Prestel system in, 217
BTX system, 217

Capital, incremental, 265
Catching-up effect, 185
Cave instinct, 75
Changing the attractor strategy, 59
Chaos
  deterministic, 184
  fractal aspects of natural growth and, 64
  management of chaotic systems, 49
Childhood to adolescence transition, 63
Chrematistics, discounting dilemna and, 5
Commercial technology policy, 41
Complexity, technology policy and, 35
Complex systems
  indicators and, 171
  new thinking and, 1
Computers
  fractal aspects of natural growth and, 63
  human communication via, 261
Context-matching theory of choosing, 277
Contextual discipline, 277
Corporations, changing, 16
Cost benefit analysis, personal travel and, 75
Creative capacity, technology policy and, 39
CRISP system, 214
Critical fluctuations, 183
Critical slowing down, 183
Cross-impact matrices, KSIM models and, 293

Death at achievement of subconsciously perceived goals, 185
Decision making, contextual discipline and, 277
Decoupling strategy, 60
Developing economies, technological advancement process and, 103
Digital Equipment Corporation, fractal aspects of natural growth and, 63
Discounting dilemma, challenge of coming decades and, 1
Dissimilar contexts, 277
Dow Ventures, using futures research at, 31
Dynamic organizational systems, technology policy and, 40

Ecological indicators, 171
Economic drives, personal travel and, 75
Economic prosperity, technological progress and, 103
Economics, new millenium and, 115
Ecosystem, world, 171
Education example, as chaotic model, 52
Enabling technologies, 26
Ethics, as plague, 345
  (Rebuttal, 351)
Europe
  fractal aspects of natural growth and, 63
  technology policy and, 35
Evolution, complex-systems indicators and, 171
Exposure time, 75

Far from equilibrium concept, 183
Feedback, Millenium Project and, 167
Fluctuating behavior, chaotic systems and, 49
Force-field, world, 171
Fractals, natural growth and, 63
France, Minitel system in, 216
Free text search, Millenium Project and, 166
Fuzzy logic, innovation systems and, 229, 309

Germany, BTX system in, 217
Global megalopolis, shrunken, 1
Global perspective, for developing economies, 103

Governance
  changing, 14
  information technology projects and, 221
Gradient descent learning algorithm, KSIM models and, 293
Group participation strategies, KSIM models and, 293
Growth patterns, Decomposition of into logistic components, 63

Incremental improvements, managing process innovation through, 265
India, CRISP project in, 214
Industrial growth, institutional mechanisms for, 229, 309
Information technology and organizations, 13
Information technology projects, large-scale, risk of failure in, 205
Innovation systems, industrial growth and, 229, 309
Institutionalization options, Millenium Project and, 156
Integrated performance systems, 255
International information system, Millenium Project and, 153

Japan, institutional mechanisms for industrial growth, 229, 309
Judgement, contextual discipline and, 277

Key Output Indicators, macro index of, 189
Kick in the pants strategy, 57
Kondratiev cycle/structure, as macropsychological order parameter, 171
Kondratiev trough, new millenium and, 115
KSIM models, 293

Least-squares algorithm, Bi-logistic growth and, 89
Linear models, of policy and governance, obsolescence of, 35
Lock and key approach, Millenium Project and, 165
Logistic function, fractal aspects of natural growth and, 63
Long-wave trough, new millenium and, 115

Macropsychological order parameter, 171
Management
  chaotic systems and, 49
  developing economies and, 103
  information technology projects and, 205
  R & D organization evaluation and, 189
Millenium, new, 115
Millenium Project, introduction to, 147
Minitel system, 216
Multiple perspectives concept
  challenge of coming decades and, 1
  institutional mechanisms for industrial growth and, 309
Multiple rounds, Millenium Project and, 167

Narrowing the universe, Millenium Project and, 166
Natural environmental indicators, large-scale, 171
Natural growth, fractal aspects of, 63
New era, new challenge, 1
New policy reality, 38
New thinking, 1
Nonlinear systems, chaotic nature of, 49

Oikonomia, discounting dilemna and, 5
Order, fractal aspects of natural growth and, 64

Past performance scoring, Millenium Project and, 166
Personal travel, anthropological invariants in, 75
Petroleum refining industry, incremental improvements and, 265
Planning, chaos and, 50
Population and technology explosions, combined impact of, 1
Present value index model, incremental improvements and, 265
Prestel system, 217
Process Delphi, Millenium Project and, 157
Process innovation, incremental improvements and, 265
Process-oriented framework, large-scale information technology projects and, 205
Project 2025, 23

R & D organizations, evaluation of, 189
Radical innovation, incremental improvements and, 265
Randomly appearing behavior, chaotic systems and, 49
Rapid technology, institutional mechanisms for industrial growth and, 309
Real systems, KSIM models and, 293
Real world, nonlinear nature of, 49
Reducing feedback strategy, 60

Saturation, 185
Shrinking product life cycles, 63
Singapore TradeNet, 210
Slow things down strategy, 57
Social model, chaotic systems and, 49
Social-systems analysis, contextual discipline and, 277
Societal-field, world, 171
Space-time, near versus distant, 4
S-shaped logistic growth model
  Bi-logistic growth and, 89
  fractal aspects of natural growth and, 63
State-of-art innovations, incremental improvements and, 265
Strategic prospective, 263
Surges, millenial, 115
Systems theory, institutional mechanisms for industrial growth and, 309

TAURUS project, 219
Taxonomy, Bi-logistic growth and, 89
Technological forecasting: 1970–1993, 23
Technological progress, personal travel and, 75
Technology, institutions, and the individual, 2
Technology change management, developing economies and, 103
Technology policy, fitting concept with reality, 35
Territory, expansion of, 75
Time series data, KSIM models and, 293
Traditional economic and social indicators, 171
Transformed space, chaotic systems and, 49
Travel behavior, anthropological invariants in, 75
Tree approach, Millenium Project and, 167

Undulatory evolution of growth, 63
Unevenness, of forecasting, 25
United Kingdom
  Department of Social Security operational strategy and, 212
  TAURUS project in, 219
United States
  complex-systems indicators and, 171
  innovation systems and, 229, 309
  technology policy and, 35

Videotex, 216
Virtual reality, innovation systems and, 229, 309
